

## Energy Monitoring Checklist April 2024

Have your class been switching things off?

| Area                           | What we're looking for   | Giraffe | Zebra | WP | Elk | Sabre | H'hog | Jaguar | Wolf | Eagle | Raccoon | ICT Suite | Studio |
|--------------------------------|--|---------|-------|----|-----|-------|-------|--------|------|-------|---------|-----------|--------|
| <b>Lights</b>                  | Are your lights switched off when the classroom is empty?                                    |         |       |    |     |       |       |        |      |       |         |           |        |
| <b>Smartboard/projector</b>    | Is your Smartboard/projector switched off when it's not in use?                              |         |       |    |     |       |       |        |      |       |         |           |        |
| <b>Laptops/iPads/Computers</b> | Are they switched off when not in use? Are they switched off at the plug when fully charged? |         |       |    |     |       |       |        |      |       |         |           |        |
| <b>External doors</b>          | Is the external door closed so no heat is being lost?  |         |       |    |     |       |       |        |      |       |         |           |        |

Improvements since March:

Sadly, standards have slipped since March 😞

Would be better if:

- Everyone remembered to turn their lights off when they leave a room. Do energy monitors need reminding? Is it time to change your energy monitor to someone more enthusiastic?
